## SUMMARY

I am a dedicated frontend developer with 3 years of experience focused on studying and developing projects in the field. My skill set includes HTML, CSS, JavaScript, TypeScript, React, Next.js, React Native, and TailwindCSS, allowing me to create interactive, responsive, and optimized interfaces across different devices.

## WORK EXPERIENCE

### Founder/Developer Social Media zucagram.com

Start up / 2023 - Present

I founded Zucagram a year and a half ago and developed its first version using React.js, Firebase Authentication, and Firebase Realtime Database to create a dynamic, secure, and high-performance social network for Brazilian immigrants. As the platform grew, I invited a more experienced developer to join the project, and we now work together. Today, Zucagram has over 4,000 users across 40 countries, continuously evolving to meet the needs of a global community.

### Founder/Developer siteparastand.pt

Personal project / 2025 - Present

Founder and developer of SiteParaStand.pt, a platform created to offer professional websites for car dealerships in Portugal. I developed the project using Next.js, TypeScript, and TailwindCSS, ensuring a modern, responsive, and SEO-optimized site. The platform serves as a showcase, allowing customers to choose and purchase customized plans. I integrated the Stripe payment system to streamline transactions and used the Domainr API so users can check the availability of their desired domain.

### Web Developer

Website for Stands / 2025

I developed a website for car dealerships using Next.js, TypeScript, and TailwindCSS, integrated with Firebase to ensure a secure and efficient solution. The system features Google authentication (Firebase Authentication) for administrators and uses Firestore as the database, providing scalable storage and real-time updates. Listings are dynamically loaded, ensuring high performance and a smooth user experience. Additionally, the website is fully responsive and SEO-optimized, enhancing visibility in search results.

## SKILLS

- HTML
- CSS
- JavaScript
- ReactJS
- NextJS
- Tailwind CSS
- TypeScript

## CERTIFICATION

### ALURA

REACT NATIVE: CREATING AN APP  
2024
